

Since its foundation in 1990, VisiCon Automatisierungstechnik GmbH has developed into a world market leader for automatic headlight adjustment systems. As international automotive supplier, we count almost all well-known automobile manufacturers among our customers.

We are a successful family-run medium-sized company. We design, produce and market systems and components for the adjustment of headlights and chassis as well as calibration systems for driver assistance systems in automotive production and the automotive supplier industry.

To strengthen our internationally operating team we are looking for a

ELECTRICAL DESIGNER (M/F/O)

What awaits you: Opportunity and perspective

- Expert and customer-specific project planning and dimensioning of electrotechnical systems for sophisticated special machines
- Preparation of complete electrical projects for electrical equipment on CAE system (E-PLAN)
- Supervision of in-house and external assembly of components
- Preparation of technical documentation and, if necessary, operating instructions
- Project-related cost and schedule control, material and supplier selection
- Cooperation in the team with our electricians, mechanics, mechanical construction, software programming and project management

What you bring along: Personality and commitment

- Completed Bachelor's degree in electrical engineering or comparable training
- Ideally very good user knowledge of CAE ePlan P8
- Ideally basic knowledge of EU directives, harmonized standards as well as relevant DIN, VDE and UVV of the BG (accident prevention)
- Ideally practical experience in the fields hydraulic systems, pneumatics, vacuum technology
- Very good German language skills and secure English language skills
- Independent, self-reliant, structured and goal-oriented way of working
- System understanding and analytical skills
- Flexibility
- Enthusiasm and commitment to new things
- Capacity for teamwork and communication skills

What we offer: Variety and development

- Exciting and varied projects in a highly innovative environment
- Individual training and challenging tasks with the opportunity to actively contribute
- Friendly, collegial and team-oriented working atmosphere with an open culture of discussion in a familiar corporate environment
- Flat hierarchies and fast decision-making processes
- Personal development opportunities through a wide range of job-related further training measures and regular exchange with colleagues
- Attractive location centrally in Germany, right next to the lively university city of Göttingen
- Occupational pension provision
- Flexible working time models
- Corporate Benefits (employee benefits of various providers)
- Regular social events (e. g. staff regulars' table, summer party, Christmas party)
- Refreshments (coffee and water at your disposal, weekly supply of fresh, regional fruit)

Sounds like your future? Then become part of the team and send us your application documents by e-mail, stating your salary expectations and the earliest possible starting date:
